## SUMMARY OF ACTIVITY IN CUBA (1 JULY 1964 - 30 SEPTEMBER 1964)

This summary is a report of activity observed on photography from 31 high altitude missions flown over Cuba during the period 1 July 1964 to 30 September 1964, and updates NPIC Report R-1286/64 covering the period 1 April 1964 to 30 June 1964.

Highlights of activity observed during this period include:

1. SAM site activity
2. Surface-to-surface missile activity
3. Assembly of CRATE aircraft
4. Additional S.O.1-class SC
5. New high frequency communications site

6. Movement of armor
7. Determination of construction activity at Corralillo and Puerto Padre.

### SAM SITE ACTIVITY

Two additional launchers, a radar and associated guidance equipment were removed from Santiago de Cuba SAM Site on [REDACTED] A 25X1D  
A similar complement of two launchers, a radar and associated guidance equipment was observed emplaced at Santiago de Cuba SAM Assembly Area on [REDACTED] 25X1D

#### SURFACE-TO-SURFACE MISSILE ACTIVITY

Two FROG launchers, at least 11 FROG missile transporters and four tracked recovery vehicles were removed from Santiago de las Vegas Military Camp on [REDACTED] 25X1D

#### AIRCRAFT ACTIVITY

Eight CRATE fuselages were observed at Campo Libertad Airfield (Figure 2) on [REDACTED] 25X1D  
[REDACTED] 25X1D

#### 25X1D CRUISE-MISSILE ACTIVITY

On [REDACTED] 25 cruise-missile crates, eight cruise-missile transporters, 10 cruise-missile-related vehicles and numerous other vehicles were missing from Guerra Cruise-Missile Storage. On [REDACTED] the camp was 25X1D vacated. From [REDACTED] 46 cruise-missile crates were observed at the newly reactivated San Jose de las Lajas Camp and Depot (Figure 1), and five cruise-missile-related vehicles were observed at an area 1.9 nm SE.

#### NAVAL ACTIVITY

Five S.O.1-class SC were observed in Havana Port on [REDACTED] No more than three had been observed at any one time prior to this date. 25X1D

#### ELECTRONICS ACTIVITY

A high frequency communications site consisting of two areas was observed at Santiago de Cuba SAM Assembly Area (Figure 3) on [REDACTED] 25X1D

**MILITARY ACTIVITY**  
**25X1D**

As of [REDACTED] the armor listed was still missing from the following military camps (dates are those the departures were first observed):

- 19 tanks/SP guns from Alto Cedro Military Camp (Area 9) on [REDACTED] 25X1D
- 21 tanks/SP guns from Calabazar Military Camp (Area 1) on [REDACTED] 25X1D
- 19 tanks/SP guns from Manzanillo Military Camp on [REDACTED] and 25X1D
- 10 tanks/SP guns from Guane Military Camp on [REDACTED] 25X1D

Ten probable tanks/SP guns were observed at a new military installation, Cuabitas Military Camp, 2.4 nm NNE of Santiago de Cuba on [REDACTED] 25X1D

**25X1D OTHER ACTIVITY**

On [REDACTED] Corralillo Military Area (Figure 4) was identified as a tank firing range.

Puerto Padre Military Area, still under construction on [REDACTED] is similar in nature to Corralillo Military Area, and is presumed to be a tank firing range. 25X1D
